

Blue Heron Pointe is a natural phenomenon in community living where humans and wildlife share common grounds. It has become a "pointe" of interest, especially to those lovers of nature who also maintain high expectation of luxurious living.

THE STRATFORD - Two Story

2 bedrooms 2050 square feet

Optional 3 bedroom Plan
2250 square feet

2 STORY
WALK-OUT
LOWER LEVEL

A prerequisite in the overall planning of Blue Heron Pointe is the preservation of nature. From the interior, this was accomplished by using energy efficient systems.

The interior of each Blue Heron Pointe home brings attention to its customized detailing and limitless display of creative architecture.

Gradations in ceiling and floor levels, windows crowned by vaulted arches, rich solid oak cabinetry and a natural log burning fireplace to enjoy the warmth of winter are just a few of the natural elements that surround each occupant.

A walk-out lower level is your "portal to paradise"; each Blue Heron home features actual water frontage. The quality of water in the lake is carefully managed to enable continued recreational use. Our well stocked lake provides fishing, ice skating, swimming and a sandy beach to soothe sunbathers.

Residents have access to "The Pointe", a common area to socialize, have a picnic or relish picturesque sunsets. Our grounds are also a haven for cross country skiers and hikers, and a boardwalk that outlines the perimeter of the lake is ideal for scenic strolls.
