THE KENTWOOD

Single-level living opens up in the Kentwood with its soaring ceilings and lots of windows

All rooms flow from the foyer where the dining area connects with the living room with its center-placed fireplace flanked by windows and optional skylights. The adjoining nook features a studio ceiling and is separated from the kitchen by an angled peninsula. The cathedral ceiling, private bath, walk-in closet and optional bay window are special touches in the master suite. A second bedroom with cathedral ceiling features a bay window in the right hand units. This flexible space may be utilized as a library or home office, if you prefer.
